Basin and petroleum system modeling is one of the most rapidly growing disciplines within the geosciences because of the high demand by industry for continuous improvement in predictions of petroleum generation migration, accumulation, and alteration.

This special volume contains 18 papers presented at the AAPG Hedberg Research Conference on Basin and Petroleum System Modeling (BPSM) held in Napa, California, May 3-8, 2009. These articles provide an overview of the current state of the science.

AAPG Hedberg Series, No. 4 will appeal to geochemists and BPSM modelers in industry, government, and academia; geoscientists with interest in region-specific BPSM studies; and specialists in different geoscience disciplines that are significant to the development of BPSM input parameters and simulation algorithms.

American Association of Petroleum Geologists (AAPG)

Founded in 1917, AAPG is the world's largest professional geological society.

AAPG is a pillar of the world-wide scientific community. Our books foster timely scientific research, advance the science of geology and promote the most efficient methods of energy exploration & processing technology and practices available today.

Some of the areas we publish in include:

Well Log Analysis

Geological Modeling
