## Global Land Ice Measurements from Space (Springer Praxis Books)

An international team of over 150 experts provide up-to-date satellite imaging and quantitative analysis of the state and dynamics of the glaciers around the world, and they provide an in-depth review of analysis methodologies. Includes an e-published supplement.

Global Land Ice Measurements from Space - Satellite Multispectral Imaging of Glaciers (GLIMS book for short) is the leading state-of-the-art technical and interpretive presentation of satellite image data and analysis of the changing state of the world's glaciers. The book is the most definitive, comprehensive product of a global glacier remote sensing consortium, Global Land Ice Measurements from Space (GLIMS, <http://www.glims.org>). With 33 chapters and a companion e-supplement, the world's foremost experts in satellite image analysis of glaciers analyze the current state and recent and possible future changes of glaciers across the globe and interpret these findings for policy planners.

Climate change is with us for some time to come, and its impacts are being felt by the world's population. The GLIMS Book, to be released about the same time as the IPCC's 5th Assessment report on global climate warming, buttresses and adds rich details and authority to the global change community's understanding of climate change impacts on the cryosphere. This will be a definitive and technically complete reference for experts and students examining the responses of glaciers to climate change. World experts demonstrate that glaciers are changing in response to the ongoing climatic upheaval in addition to other factors that pertain to the circumstances of individual glaciers. The global mosaic of glacier changes is documented by quantitative analyses and are placed into a perspective of causative factors. Starting with a Foreword, Preface, and Introduction, the GLIMS book gives the rationale for and history of glacier monitoring and satellite data analysis. It includes a comprehensive set of six "how-to" methodology chapters, twenty-five chapters detailing regional glacier state and dynamical changes, and an in-depth summary and interpretation chapter placing the observed glacier changes into a global context of the coupled atmosphere-land-ocean system.

An accompanying e-supplement will include oversize imagery and other other highly visual renderings of scientific data.

### **From reader reviews:**

#### **Shane McKeel:**

Book is definitely written, printed, or illustrated for everything. You can know everything you want by a reserve. Book has a different type. As you may know that book is important matter to bring us around the world. Adjacent to that you can your reading skill was fluently. A guide Global Land Ice Measurements from Space (Springer Praxis Books) will make you to always be smarter. You can feel a lot more confidence if you can know about everything. But some of you think that open or reading a book make you bored. It is not make you fun. Why they could be thought like that? Have you looking for best book or ideal book with you?

#### **Augustus Chase:**

Often the book Global Land Ice Measurements from Space (Springer Praxis Books) has a lot info on it. So when you make sure to read this book you can get a lot of benefit. The book was written by the very famous author. The author makes some research previous to write this book. This kind of book very easy to read you may get the point easily after scanning this book.

#### **Hubert Wooten:**

You may get this Global Land Ice Measurements from Space (Springer Praxis Books) by go to the bookstore or Mall. Simply viewing or reviewing it may to be your solve issue if you get difficulties for ones knowledge. Kinds of this reserve are various. Not only by simply written or printed but can you enjoy this book simply by e-book. In the modern era such as now, you just looking because of your mobile phone and searching what their problem. Right now, choose your ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose proper ways for you.

#### **Curt Stewart:**

As a student exactly feel bored to reading. If their teacher asked them to go to the library or make summary for some publication, they are complained. Just little students that has reading's soul or real their hobby. They just do what the educator want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that studying is not important, boring in addition to can't see colorful photos on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Global Land Ice Measurements from Space (Springer Praxis Books) can make you sense more interested to read.
