Cutaneous Lymphomas, Pseudolymphomas, and Related Disorders

G. Burg, O. Braun-Falco

Cutaneous Lymphomas, Pseudolymphomas, and Related Disorders G. Burg, O. Braun-Falco

The term "lymphoma" was originally used by Billroth in 1871 [55], and by Virehow [763] some years before that, for the designation of swelling of lymph nodes that was not due to "eareinoma, sareoma, ehondroma, myxoma, etc. " In his paper, Billroth recounted sueeessful treatment with arsenie (" Fowler's solution") of multiple "lymphomas" that had developed in a 40-year-old woman during a 10-month period. From this report it is not entirely clear if the multiple" lymphomas" deseribed were infeetious or if they were eonsis te nt with what we now mean by "malignant lymphoma. " Today, the term "malignant lymphoma" is generally used eolleectively for malignant lymphoproliferative neoplasms that tend to arise in lymph nodes and also eneompasess Hodgkin's disease and non-Hodgkin's lymphomas. The adjeective "malignant" seems somewhat superfluus sinee, in addition to Bill roth's original eonnotation, the sense of malignaney is nowadays read into the word "lymphoma. " To be sure, true, i. e. , malignant, lymphomas have to be differentiated from "pseudolymphomas," or to put it more exaetly, "pseudomalignant lymphomas. " In this book, "lymphoma" and "malignant lymphoma" are used interehan geably for malignant neoplastie lymphoproliferative disorders, and "pseudo lymphoma" is used for benign lymphomatous proeesses. Our editorial eonsultant, Dr. M. Leider, disagrees with all of this. In his Dictionary of Dermatological Words, Terms, and Phrases [421] and other works, he maintains that there is no etymologieal basis for words bearing the eontrived suffix" - oma" or the true Greek suffix" -ma" to denote malignaney.
