Multimedia Information Retrieval: Theory and Techniques (Chandos Information Professional Series)

Roberto Raieli

Novel processing and searching tools for the management of new multimedia documents have developed. Multimedia Information Retrieval (MIR) is an organic system made up of Text Retrieval (TR); Visual Retrieval (VR); Video Retrieval (VDR); and Audio Retrieval (AR) systems. So that each type of digital document may be analysed and searched by the elements of language appropriate to its nature, search criteria must be extended. Such an approach is known as the Content Based Information Retrieval (CBIR), and is the core of MIR. This novel content-based concept of information handling needs to be integrated with more traditional semantics. Multimedia Information Retrieval focuses on the tools of processing and searching applicable to the content-based management of new multimedia documents. Translated from Italian by Giles Smith, the book is divided into two parts. Part one discusses MIR and related theories, and puts forward new methodologies; part two reviews various experimental and operating MIR systems, and presents technical and practical conclusions.

- Gives a complete, organic picture of MIR and CBIR
- Proposes a novel conceptualisation around the ideas of Information Retrieval (IR) and digital document management in the context of Library and Information Science (LIS)
- Relevant for both library and information science and information technology specialists

From reader reviews:

Edward Capps:

This Multimedia Information Retrieval: Theory and Techniques (Chandos Information Professional Series) book is not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is definitely information inside this publication incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. This specific Multimedia Information Retrieval: Theory and Techniques (Chandos Information Professional Series) without we recognize teach the one who reading it become critical in thinking and analyzing. Don't become worry Multimedia Information Retrieval: Theory and Techniques (Chandos Information Professional Series) can bring any time you are and not make your case space or bookshelves' become full because you can have it within your lovely laptop even mobile phone. This Multimedia Information Retrieval: Theory and Techniques (Chandos Information Professional Series) having fine arrangement in word and layout, so you will not truly feel uninterested in reading.

Corey Smith:

Reading a book can be one of a lot of task that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new facts. When you read a book you will get new information mainly because book is one of numerous ways to share the information as well as their idea. Second, looking at a book will make an individual more imaginative. When you reading through a book especially hype book the author will bring one to imagine the story how the personas do it anything. Third, you can share your knowledge to other people. When you read this Multimedia Information Retrieval: Theory and Techniques (Chandos Information Professional Series), you could tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a book.

Jason Cook:

Spent a free the perfect time to be fun activity to complete! A lot of people spent their free time with their family, or their friends. Usually they carrying out activity like watching television, going to beach, or picnic within the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? Could be reading a book is usually option to fill your cost-free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the guide untitled Multimedia Information Retrieval: Theory and Techniques (Chandos Information Professional Series) can be excellent book to read. May be it might be best activity to you.

Antonio Mock:

The book Multimedia Information Retrieval: Theory and Techniques (Chandos Information Professional Series) has a lot info on it. So when you make sure to read this book you can get a lot of gain. The book was

published by the very famous author. McDougal makes some research previous to write this book. This book very easy to read you can find the point easily after looking over this book.
