Dr. Euler's Fabulous Formula: Cures Many Mathematical Ills Paul J. Nahin

> *I used to think math was no fun*
> *'Cause I couldn't see how it was done*
> *Now Euler's my hero*
> *For I now see why zero*
> *Equals $e^{[pi] i}+1$*
> --Paul Nahin, electrical engineer

In the mid-eighteenth century, Swiss-born mathematician Leonhard Euler developed a formula so innovative and complex that it continues to inspire research, discussion, and even the occasional limerick. *Dr. Euler's Fabulous Formula* shares the fascinating story of this groundbreaking formula--long regarded as the gold standard for mathematical beauty--and shows why it still lies at the heart of complex number theory.

This book is the sequel to Paul Nahin's *An Imaginary Tale: The Story of I [the square root of -1]*, which chronicled the events leading up to the discovery of one of mathematics' most elusive numbers, the square root of minus one. Unlike the earlier book, which devoted a significant amount of space to the historical development of complex numbers, Dr. Euler begins with discussions of many sophisticated applications of complex numbers in pure and applied mathematics, and to electronic technology. The topics covered span a huge range, from a never-before-told tale of an encounter between the famous mathematician G. H. Hardy and the physicist Arthur Schuster, to a discussion of the theoretical basis for single-sideband AM radio, to the design of chase-and-escape problems.

The book is accessible to any reader with the equivalent of the first two years of college mathematics (calculus and differential equations), and it promises to inspire new applications for years to come. Or as Nahin writes in the book's preface: To mathematicians ten thousand years hence, "Euler's formula will still be beautiful and stunning and untarnished by time."

From reader reviews:

Corey Gardner:

What do you concerning book? It is not important with you? Or just adding material when you require something to explain what you problem? How about your time? Or are you busy man? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? All people has many questions above. They must answer that question since just their can do this. It said that about publication. Book is familiar on every person. Yes, it is suitable. Because start from on pre-school until university need this specific Dr. Euler's Fabulous Formula: Cures Many Mathematical Ills to read.

Kevin Ostby:

Nowadays reading books be a little more than want or need but also get a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The data you get based on what kind of publication you read, if you want send more knowledge just go with schooling books but if you want experience happy read one with theme for entertaining for instance comic or novel. The actual Dr. Euler's Fabulous Formula: Cures Many Mathematical Ills is kind of guide which is giving the reader unstable experience.

Jason Serrano:

Reading a book for being new life style in this year; every people loves to read a book. When you read a book you can get a lots of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what types of book that you have read. If you would like get information about your examine, you can read education books, but if you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, and also soon. The Dr. Euler's Fabulous Formula: Cures Many Mathematical Ills provide you with a new experience in reading through a book.

Karen Strange:

In this era which is the greater particular person or who has ability to do something more are more important than other. Do you want to become considered one of it? It is just simple way to have that. What you must do is just spending your time not very much but quite enough to possess a look at some books. One of the books in the top checklist in your reading list will be Dr. Euler's Fabulous Formula: Cures Many Mathematical Ills. This book which can be qualified as The Hungry Hills can get you closer in getting precious person. By looking upward and review this book you can get many advantages.
