## Preview:

*The Sixth Extinction* is a book by award-winning journalist Elizabeth Kolbert. In this book, the author demonstrates that species are dying out at a rate comparable to the previous mass extinctions, and if the trend of global warming, deforestation, and pollution continues in its present course, the numbers of extinct species will meet or exceed that rate of destruction. This event will include the extinction of humanity. What this means is that the current loss of life today will soon justify the term "The Sixth Extinction", a mass extinction like the one that destroyed the dinosaurs 65 million years ago.

When humans originated about 100,000 years ago, they began to hunt some species into extinction. Their ability to outcompete other early hominids for food led to the extinction of those species, including Neanderthals.

The extinction of species picked up steam when humans began transforming great swaths of forest and plains into farmland about 10,000 years ago....

**Please note: this audiobook includes key takeaways and an analysis of the book - not the original book.**

#### **Kimberly Duda:**

As a scholar exactly feel bored to help reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just very little students that has reading's soul or real their leisure activity. They just do what the educator want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that reading through is not important, boring and can't see colorful images on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this The Sixth Extinction, by Elizabeth Kolbert: Key Takeaways, Analysis, & Review can make you truly feel more interested to read.
