Design in Nature: Learning from Trees Claus Mattheck

The chicken bone you nibbled yesterday and threw away was a high-tech product! Not only that: it was a superlative light-weight design, functionally adapted to its mechanical requirements. No engineer in the world has, as yet, been able to copy this structural member, which is excellently optimized in its external shape and its internal architecture as regards minimum weight and maximum strength. The tree stem on which you recently carved your initials has also, by life-long care for its body, steadily improved its internal and external structure and adapted optimally to new loads. In the course of its biomechanical self-optimization it will heal up the notch you cut as speedily as possible, in order to repair even the smallest weak point, which might otherwise cost it its life in the next storm. This book is dedicated to the understanding of this biomechanical optimization of shape. It is the synthesis of many years of extensive research using the latest computer methods at the Karlsruhe Research Centre to help understand the mechanism of biological self-optimization (adaptive growth) and to simulate it by computer. The method newly developed for this purpose was called CAO (Computer-Aided Optimization). With this method, it is possible to predict the growth of trees, bones and other biological structures from the tiger's claw to the sea urchin's skeleton.

From reader reviews:

Ken Martin:

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite reserve and reading a book. Beside you can solve your condition; you can add your knowledge by the book entitled Design in Nature: Learning from Trees. Try to the actual book Design in Nature: Learning from Trees as your pal. It means that it can to get your friend when you experience alone and beside that course make you smarter than in the past. Yeah, it is very fortuned for you personally. The book makes you much more confidence because you can know almost everything by the book. So , we need to make new experience and also knowledge with this book.

Ruby Mejia:

Within other case, little persons like to read book Design in Nature: Learning from Trees. You can choose the best book if you'd prefer reading a book. As long as we know about how is important some sort of book Design in Nature: Learning from Trees. You can add information and of course you can around the world by just a book. Absolutely right, since from book you can know everything! From your country until eventually foreign or abroad you will find yourself known. About simple thing until wonderful thing you may know that. In this era, we could open a book or perhaps searching by internet product. It is called e-book. You should use it when you feel bored to go to the library. Let's study.

Audrey Stockman:

Do you have something that you like such as book? The reserve lovers usually prefer to choose book like comic, quick story and the biggest one is novel. Now, why not striving Design in Nature: Learning from Trees that give your satisfaction preference will be satisfied by means of reading this book. Reading addiction all over the world can be said as the opportrnity for people to know world considerably better then how they react to the world. It can't be said constantly that reading routine only for the geeky man or woman but for all of you who wants to be success person. So , for all of you who want to start reading through as your good habit, it is possible to pick Design in Nature: Learning from Trees become your starter.

Oren Nelson:

This Design in Nature: Learning from Trees is brand new way for you who has attention to look for some information because it relief your hunger details. Getting deeper you in it getting knowledge more you know or else you who still having tiny amount of digest in reading this Design in Nature: Learning from Trees can be the light food for you personally because the information inside this particular book is easy to get by simply anyone. These books acquire itself in the form which can be reachable by anyone, yeah I mean in the e-book contact form. People who think that in publication form make them feel drowsy even dizzy this publication is the answer. So there is no in reading a book especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss the idea! Just read this e-book kind for your better life along with knowledge.
