Giants of the Lost World: Dinosaurs and Other Extinct Monsters of South America

Donald R. Prothero

Giants of the Lost World: Dinosaurs and Other Extinct Monsters of South America Donald R. Prothero
More than a hundred years ago, Sir Arthur Conan Doyle wrote a novel called *The Lost World* with the exciting premise that dinosaurs and other prehistoric beasts still ruled in South America. Little did Conan Doyle know, there were terrifying monsters in South America--they just happened to be extinct. In fact, South America has an incredible history as a land where many strange creatures evolved and died out. In his book *Giants of the Lost World: Dinosaurs and Other Extinct Monsters of South America*, Donald R. Prothero uncovers the real science and history behind this fascinating story. The largest animal ever discovered was the huge sauropod dinosaur *Argentinosaurus*, which was about 130 feet long and weighed up to 100 tons. The carnivorous predator *Giganotosaurus* weighed in at more than 8 tons and measured more than 47 feet long, dwarfing the *T. rex* in comparison. Gigantic anacondas broke reptile records; possums evolved into huge saber-toothed predators; and ground sloths grew larger than elephants in this strange, unknown land. Prothero presents the scientific details about each of these prehistoric beasts, provides a picture of the ancient landscapes they once roamed, and includes the stories of the individuals who first discovered their fossils for a captivating account of a lost world that is stranger than fiction.
