# Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series)

## Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series)

The growing interest in using combination drugs to treat various complex diseases has spawned the development of many novel statistical methodologies. The theoretical development, coupled with advances in statistical computing, makes it possible to apply these emerging statistical methods in *in vitro* and *in vivo* drug combination assessments. However, despite these advances, no book has served as a single source of information for statistical methods in drug combination research, nor has there been any guidance for experimental strategies.

Statistical Methods in Drug Combination Studies fills that gap, covering all aspects of drug combination research, from designing *in vitro* drug combination studies to analyzing clinical trial data. Featuring contributions from researchers in industry, academia, and regulatory agencies, this comprehensive reference:

- Describes statistical models used to characterize dose–response patterns of monotherapies and evaluate the combination drug synergy
- Offers guidance for estimating interaction indices and constructing their associated confidence intervals to assess drug interaction
- Introduces a practical and innovative Bayesian approach to Phase I cancer trials, including actual trial examples to illustrate use
- Examines strategies in the fixed-dose combination therapy clinical development via case studies stemming from regulatory reviews
- Evaluates computational tools and software packages used to apply novel statistical methods in combination drug development

**Statistical Methods in Drug Combination Studies** provides researchers with a solid understanding of the available statistical methods and computational tools and how to apply them in drug combination studies. The book is equally useful for statisticians to become better equipped to deal with drug combination study design and analysis in their practice.

### **From reader reviews:**

#### **Kim Bartlett:**

The book Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) can give more knowledge and information about everything you want. Why must we leave the good thing like a book Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series)? A few of you have a different opinion about reserve. But one aim in which book can give many information for us. It is absolutely correct. Right now, try to closer using your book. Knowledge or details that you take for that, it is possible to give for each other; it is possible to share all of these. Book Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) has simple shape however, you know: it has great and large function for you. You can appearance the enormous world by start and read a book. So it is very wonderful.

#### **Kimberly Hopkins:**

You could spend your free time you just read this book this e-book. This Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) is simple to develop you can read it in the recreation area, in the beach, train and also soon. If you did not possess much space to bring the particular printed book, you can buy the e-book. It is make you quicker to read it. You can save typically the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

#### **Tyler Woodley:**

Many people spending their time by playing outside together with friends, fun activity along with family or just watching TV the entire day. You can have new activity to spend your whole day by studying a book. Ugh, think reading a book will surely hard because you have to use the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Cell phone. Like Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) which is obtaining the e-book version. So , try out this book? Let's observe.

#### **Audrey Patton:**

That guide can make you to feel relax. This particular book Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) was colourful and of course has pictures on there. As we know that book Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) has many kinds or genre. Start from kids until young adults. For example Naruto or Detective Conan you can read and think you are the character on there. So , not at all of book are generally make you bored, any it offers you feel happy, fun and unwind. Try to choose the best book to suit your needs and try to like reading in which.
