With college costs rising faster than inflation year after year, getting that college degree is becoming less and less affordable for many students. Many of them take out sizable school loans only to find themselves overburdened by onerous loan payments. So many students look for part-time jobs while they're in college. Most of the well-known jobs are low paying jobs. Fast food and retail employ a lot of college students, but the wages are at or barely above minimum wage. The result is long hours for low pay-hours that could have been spent studying or partying. This book shows students how to find the unusual jobs that pay much more than average. The author draws on his experiences while he was a college student. The stories in the book are true; the examples the author gives are real. The author used these same strategies to earn significantly more than minimum wage while he worked his way through college. This book will be helpful to college students and high school students trying to save money for college. The information will also be welcomed by parents who are writing the checks for their students' college expenses.
