Interactive Segmentation Techniques: Algorithms and Performance Evaluation (SpringerBriefs in Electrical and Computer Engineering)

Jia He, Chang-Su Kim, C.-C. Jay Kuo

Interactive Segmentation Techniques: Algorithms and Performance Evaluation (SpringerBriefs in Electrical and Computer Engineering) Jia He, Chang-Su Kim, C.-C. Jay Kuo

This book focuses on interactive segmentation techniques, which have been extensively studied in recent decades. Interactive segmentation emphasizes clear extraction of objects of interest, whose locations are roughly indicated by human interactions based on high level perception. This book will first introduce classic graph-cut segmentation algorithms and then discuss state-of-the-art techniques, including graph matching methods, region merging and label propagation, clustering methods, and segmentation methods based on edge detection. A comparative analysis of these methods will be provided with quantitative and qualitative performance evaluation, which will be illustrated using natural and synthetic images. Also, extensive statistical performance comparisons will be made. Pros and cons of these interactive segmentation methods will be pointed out, and their applications will be discussed.

There have been only a few surveys on interactive segmentation techniques, and those surveys do not cover recent state-of-the-art techniques. By providing comprehensive up-to-date survey on the fast developing topic and the performance evaluation, this book can help readers learn interactive segmentation techniques quickly and thoroughly.

From reader reviews:

David Shetler:

In this 21st one hundred year, people become competitive in every way. By being competitive currently, people have to do something to make these individuals survive, being in the middle of typically the crowded place and notice by simply surrounding. One thing that at times many people have underestimated this for a while is reading. Yes, by reading a reserve your ability to survive enhance then having chance to stand up than other is high. In your case who want to start reading the book, we give you this particular Interactive Segmentation Techniques: Algorithms and Performance Evaluation (SpringerBriefs in Electrical and Computer Engineering) book as beginner and daily reading publication. Why, because this book is more than just a book.

Rufus George:

You could spend your free time to learn this book this book. This Interactive Segmentation Techniques: Algorithms and Performance Evaluation (SpringerBriefs in Electrical and Computer Engineering) is simple to bring you can read it in the park, in the beach, train along with soon. If you did not have much space to bring the particular printed book, you can buy the particular e-book. It is make you simpler to read it. You can save the particular book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

Linda Amato:

Many people spending their moment by playing outside with friends, fun activity with family or just watching TV the whole day. You can have new activity to spend your whole day by reading through a book. Ugh, ya think reading a book can definitely hard because you have to take the book everywhere? It ok you can have the e-book, getting everywhere you want in your Touch screen phone. Like Interactive Segmentation Techniques: Algorithms and Performance Evaluation (SpringerBriefs in Electrical and Computer Engineering) which is having the e-book version. So , why not try out this book? Let's notice.

Stella Neal:

What is your hobby? Have you heard this question when you got students? We believe that that question was given by teacher on their students. Many kinds of hobby, All people has different hobby. And you know that little person including reading or as looking at become their hobby. You must know that reading is very important and book as to be the matter. Book is important thing to increase you knowledge, except your teacher or lecturer. You see good news or update in relation to something by book. A substantial number of sorts of books that can you decide to try be your object. One of them is actually Interactive Segmentation Techniques: Algorithms and Performance Evaluation (SpringerBriefs in Electrical and Computer Engineering).
