Myocardial Biopsy: Diagnostic Significance

Myocardial Biopsy: Diagnostic Significance

The diagnostic relevance of results, obtained by myocardial biopsy has not yet been defined. This book is the outcome of an international meeting which took place in July 1978 to assess the importance of myocardial biopsy. The meeting was organized under the auspices of the International Society and Federation of Cardiology, and speakers from many parts of Europe were invited to report on their experience with this new technique. The special aim was to correlate myocardial biopsy results with clinical and hemodynamic data in different myocardial diseases and to outline the relevance of myocardial biopsy techniques for morphological, morphometric, immunologic and biochemical purposes. Most of the essential parts of the discussions has been included in the text of the contributors. I should like to express my gratitude to Professor J.F. Goodwin, Professor E.G.J. Olsen, and Professor G. Riecker, who acted as chair men and to all the participants of the workshop. I should particularly like to thank Professor G. Riecker who encouraged the search for new ideas and insight into disease processes. I should like to acknowledge gratefully the generous financial support given by Pharma Schwarz, Monheim, West-Germany. In addition I am particularly grateful to the Springer-Verlag, who has arranged this edition accurately, including special intentions of the editor.
