**Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water** J.M. Neff

Large volumes of produced water are generated and discharged to the coastal and ocean waters worldwide from offshore oil and gas production facilities. There is concern that the chemicals in the produced water may harm marine ecosystems. This book summarizes the bioavailability and marine ecotoxicology of metal and organic contaminants that may occur in oil well produced water at concentrations significantly higher than those in ambient seawater. The contaminants of concern include arsenic, barium, cadmium, chromium, copper, lead, mercury, radium isotopes, zinc, monocyclic aromatic hydrocarbons, polycyclic aromatic hydrocarbons, phenols, and bis(2-ethylhexyl)phthalate.

The first part of the book is a detailed discussion of the chemical composition of produced water from offshore oil wells worldwide and its fates following discharge to the ocean. The remaining chapters of the book summarize the current scientific literature on the sources and distributions in the ocean of each of the contaminants of concern and their bioaccumulation and toxicity to marine organisms.

This book will be of value to: environmental scientists in the oil and gas industry; marine toxicologists and ecological risk assessors in academia, government, and industry; government regulatory agencies concerned with marine environmental protection.

The book advances the concept that bioavailability evaluation must be included in all ecological risk assessments and other environmental assessments of chemical contaminants in marine and freshwater ecosystems.

### **From reader reviews:**

#### **Alma Rasmussen:**

People live in this new time of lifestyle always try and must have the time or they will get lot of stress from both everyday life and work. So , if we ask do people have extra time, we will say absolutely of course. People is human not really a robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to you actually of course your answer will unlimited right. Then do you try this one, reading ebooks. It can be your alternative inside spending your spare time, typically the book you have read will be Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water.

#### **Harry Branham:**

Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water can be one of your nice books that are good idea. Many of us recommend that straight away because this publication has good vocabulary which could increase your knowledge in language, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort to set every word into satisfaction arrangement in writing Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water although doesn't forget the main stage, giving the reader the hottest along with based confirm resource information that maybe you can be one of it. This great information could drawn you into completely new stage of crucial considering.

#### **Colleen Edwards:**

Reading a book to become new life style in this 12 months; every people loves to study a book. When you examine a book you can get a wide range of benefit. When you read publications, you can improve your knowledge, due to the fact book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your analysis, you can read education books, but if you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, as well as soon. The Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water will give you new experience in reading through a book.

#### **Delilah Jordan:**

This Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water is completely new way for you who has fascination to look for some information since it relief your hunger details. Getting deeper you into it getting knowledge more you know or else you who still having bit of digest in reading this Bioaccumulation in Marine Organisms: Effect of Contaminants from Oil Well Produced Water can be the light food for you personally because the information inside this specific book is easy to get by anyone. These books develop itself in the form which is reachable by anyone, that's why I mean in the e-book form. People who think that in publication form make them feel sleepy even dizzy this publication is the answer. So there is absolutely no in reading a e-book especially this one. You can find

what you are looking for. It should be here for a person. So , don't miss the idea! Just read this e-book sort for your better life along with knowledge.
