Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics)

Eugene F. Krause

Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) Eugene F. Krause

This entertaining, stimulating textbook offers anyone familiar with Euclidean geometry — undergraduate math students, advanced high school students, and puzzle fans of any age — an opportunity to explore taxicab geometry, a simple, non-Euclidean system that helps put Euclidean geometry in sharper perspective. In taxicab geometry, the shortest distance between two points is not a straight line. Distance is not measured as the crow flies, but as a taxicab travels the "grid" of the city street, from block to block, vertically and horizontally, until the destination is reached. Because of this non-Euclidean method of measuring distance, some familiar geometric figures are transmitted: for example, circles become squares.

However, taxicab geometry has important practical applications. As Professor Krause points out, "While Euclidean geometry appears to be a good model of the 'natural' world, taxicab geometry is a better model of the artificial urban world that man has built."

As a result, the book is replete with practical applications of this non-Euclidean system to urban geometry and urban planning — from deciding the optimum location for a factory or a phone booth, to determining the most efficient routes for a mass transit system.

The underlying emphasis throughout this unique, challenging textbook is on how mathematicians think, and how they apply an apparently theoretical system to the solution of real-world problems.

From reader reviews:

Noah Cale:

Nowadays reading books be than want or need but also work as a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The details you get based on what kind of guide you read, if you want get more knowledge just go with education books but if you want really feel happy read one using theme for entertaining for instance comic or novel. The particular Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) is kind of publication which is giving the reader erratic experience.

Alan Levin:

Typically the book Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) has a lot of information on it. So when you make sure to read this book you can get a lot of gain. The book was published by the very famous author. The writer makes some research just before write this book. This kind of book very easy to read you will get the point easily after perusing this book.

Dora Champagne:

Do you like reading a guide? Confuse to looking for your chosen book? Or your book was rare? Why so many issue for the book? But just about any people feel that they enjoy regarding reading. Some people likes reading through, not only science book but additionally novel and Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) or even others sources were given understanding for you. After you know how the great a book, you feel desire to read more and more. Science e-book was created for teacher or even students especially. Those ebooks are helping them to include their knowledge. In various other case, beside science book, any other book likes Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) to make your spare time much more colorful. Many types of book like this.

Joshua Little:

What is your hobby? Have you heard which question when you got learners? We believe that that query was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you know that little person just like reading or as examining become their hobby. You must know that reading is very important along with book as to be the factor. Book is important thing to add you knowledge, except your teacher or lecturer. You see good news or update about something by book. Different categories of books that can you choose to adopt be your object. One of them are these claims Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics).
