**The Clinic and Elsewhere: addiction, adolescents, and the afterlife of therapy (In vivo: the cultural mediations of biomedical science)** Todd Meyers

By following a group of adolescents from the time they enter drug rehabilitation treatment through their reentry into the outside world--the clinic, their homes and neighborhoods, and other institutional settings--Meyers traces patterns of life that become mediated by pharmaceutical intervention. The book is at once a meditative work of anthropology, a demonstration of the theoretical and methodological limits of medical research, and a forceful intervention into the philosophy of therapeutics at the level of the individual.
