## **Radar Signal Analysis and Processing Using MATLAB** Bassem R. Mahafza

Offering radar-related software for the analysis and design of radar waveform and signal processing, **Radar Signal Analysis and Processing Using MATLAB®** provides a comprehensive source of theoretical and practical information on radar signals, signal analysis, and radar signal processing with companion MATLAB® code.

After an overview of radar systems operation and design, the book reviews elements of signal theory relevant to radar detection and radar signal processing, along with random variables and processes. The author then presents the unique characteristic of the matched filter and develops a general formula for the output of the matched filter that is valid for any waveform. He analyzes several analog waveforms, including the linear frequency modulation pulse and stepped frequency waveforms, as well as unmodulated pulse-train, binary, polyphase, and frequency codes. The book explores radar target detection and pulse integration, emphasizing the constant false alarm rate. It also covers the stretch processor, the moving target indicator, radar Doppler processing, beamforming, and adaptive array processing.

Using configurable MATLAB code, this book demonstrates how to apply signal processing to radar applications. It includes many examples and problems to illustrate the practical application of the theory.

### **From reader reviews:**

#### **Eric Vegas:**

The book Radar Signal Analysis and Processing Using MATLAB can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the good thing like a book Radar Signal Analysis and Processing Using MATLAB? Wide variety you have a different opinion about book. But one aim this book can give many data for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or facts that you take for that, you can give for each other; you could share all of these. Book Radar Signal Analysis and Processing Using MATLAB has simple shape but the truth is know: it has great and large function for you. You can appear the enormous world by open up and read a book. So it is very wonderful.

#### **David McGowan:**

Now a day folks who Living in the era where everything reachable by talk with the internet and the resources inside can be true or not call for people to be aware of each data they get. How individuals to be smart in receiving any information nowadays? Of course the solution is reading a book. Looking at a book can help men and women out of this uncertainty Information specifically this Radar Signal Analysis and Processing Using MATLAB book as this book offers you rich info and knowledge. Of course the information in this book hundred per cent guarantees there is no doubt in it everybody knows.

#### **Margaret Parker:**

Hey guys, do you wants to finds a new book to see? May be the book with the title Radar Signal Analysis and Processing Using MATLAB suitable to you? Often the book was written by famous writer in this era. The actual book untitled Radar Signal Analysis and Processing Using MATLAB is the main one of several books this everyone read now. This book was inspired a lot of people in the world. When you read this guide you will enter the new shape that you ever know before. The author explained their plan in the simple way, consequently all of people can easily to be aware of the core of this e-book. This book will give you a lot of information about this world now. In order to see the represented of the world within this book.

#### **Esther Cunningham:**

Reading a publication make you to get more knowledge from it. You can take knowledge and information from a book. Book is prepared or printed or illustrated from each source that will filled update of news. Within this modern era like right now, many ways to get information are available for a person. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just searching for the Radar Signal Analysis and Processing Using MATLAB when you necessary it?
